

# ENERGISER ACTIVITIES YEAR 5-6

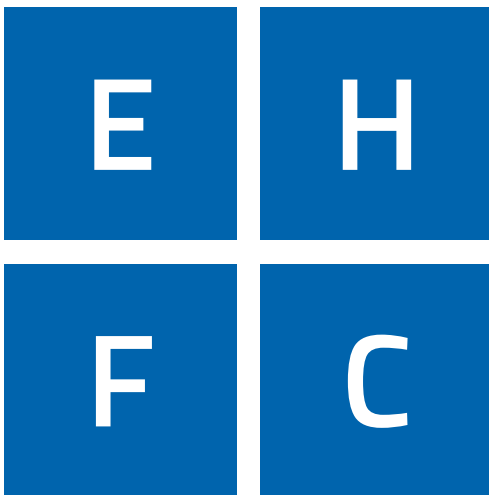

At Maths Pathway, we use Energisers to invigorate the minds of students before or during a maths lesson. We know it can be hard to motivate kids to do their homework or begin a homeschool class, so try out these activities as a first step or to re-engage your kids half way through an activity.

## Which one doesn't belong

In these activities you need to find one or more reasons why each does not belong. There are no answers provided as there is no one right answer. You just need to be able to explain the thinking behind your answers.
